

## Nuwa Version(2.4.7.0) Release

April 29, 2024

## Overview

Tersus GNSS Inc. ("Tersus") is glad to release the Nuwa for GNSS receiver. Nuwa version (2.4.7.0) is available to download at <a href="https://www.tersus-gnss.com/software/software">www.tersus-gnss.com/software/software</a> and support documents are available at <a href="https://www.tersus-gnss.com/document/software">www.tersus-gnss.com/document/software</a>.

## **Features**

- > Assists with Bluetooth/USB connection
- Configure base/rover setup
- Visualized interface for receiver operations
- Data management (import/export)

## **Change from Previous Versions**

Issue	Туре	Version
Added CAD Survey module.	Enhancement	
Added Visual Positioning for Oscar Trek.	Enhancement	
Added code attributes feature.	Enhancement	
Added Internal GPS connection way.	Enhancement	
Added Area Division module.	Enhancement	
Added automatic time zone setting.	Enhancement	
Added project list sorting function.	Enhancement	
Added the display of satellite in used number.	Enhancement	
Added outputting of RTK status, satellite numbers and DOP values in location sharing.	Enhancement	
Added prefix setting in DXF vector map import.	Enhancement	
Added setting of distance decimal display.	Enhancement	
Added one-key deselect all in cloud sync.	Enhancement	2.4.7.0
Added base low battery alarm.	Enhancement	2.4.7.0
Added repeat measurement and export.	Enhancement	
Added acceptance status display of correction data via controller network or UHF in Survey interface.	Enhancement	
Added RTK mode, distance to last, line name in points detail and exporting.	Enhancement	
Added setting of displaying survey line detail.	Enhancement	
Added support for grid to ground calculation under Lambert projection.	Enhancement	
Updated Dutch and French languages.	Enhancement	
Fixed possible crash with David30-TAP.	Bug Fix	
Fixed possible incorrect antenna and missing	Bug Fix	

ephemeris in static survey with David30.  Fixed the issue of successful registration but may prompt an error with David30.  Optimized Base record, refreshing Base after getting base antenna height.  Optimized Base record, not repeating the same Base point.  Fixed the issue of directly overwriting the old points when inputting the same name in confirmation box in stakeout.  Fixed the issue that some road LandXML files may fail to be imported.  Optimized color display in Surface Stakeout.  Fixed the issue that Diff Age is shown as 99.  Fixed the issue that the azimuth calculation of incomplete out-clothoid may be wrong.  Added point list order function.  Optimized point list display.  Added support for David30-TAP connection.  Added support for David30-TAP connection.  Added graphic measurement containing polygons, rectangles, arcs, and circles added in Survey interface.  Added point name intelligent filling in Survey.  Enhancement  Added angle display for electronic bubble.  Added offset item display in Line Stakeout.  Enhancement  Added offset item display in Line Stakeout.  Enhancement  Added offset item display in Line Stakeout.  Enhancement  Enhancement  Added offset item display in Line Stakeout.  Enhancement  Enhancement  Enhancement			
Bug Fix  Optimized Base record, refreshing Base after getting base antenna height.  Optimized Base record, not repeating the same Base point.  Fixed the issue of directly overwriting the old points when inputting the same name in confirmation box in stakeout.  Fixed the issue that some road LandXML files may fail to be imported.  Optimized color display in Surface Stakeout.  Fixed possible issue that Diff Age is shown as 99.  Fixed the issue that the azimuth calculation of incomplete out-clothoid may be wrong.  Added point list order function.  Optimized point list order function.  Enhancement  Added support for David30-TAP connection.  Enhancement  Added support for TAP network mode, and added TAP coordinate conversion.  Added graphic measurement containing polygons, rectangles, arcs, and circles added in Survey interface.  Added angle display for electronic bubble.  Enhancement  Added angle display for electronic bubble.  Enhancement	ephemeris in static survey with David30.		
may prompt an error with David30.  Optimized Base record, refreshing Base after getting base antenna height.  Optimized Base record, not repeating the same Base point.  Fixed the issue of directly overwriting the old points when inputting the same name in confirmation box in stakeout.  Fixed the issue that some road LandXML files may fail to be imported.  Optimized color display in Surface Stakeout.  Fixed possible issue that Diff Age is shown as 99.  Fixed the issue that the azimuth calculation of incomplete out-clothoid may be wrong. polygons, rectangles, arcs, and circles added in Survey interface.  Added point name intelligent filling in Survey.  Enhancement  Added angle display for electronic bubble.  Enhancement  Added offset measurement mode.	Added graphic measurement containing		2.4.6.0
Added point name intelligent filling in Survey. Enhancement  Added angle display for electronic bubble. Enhancement  Added offset measurement mode. Enhancement	polygons, rectangles, arcs, and circles added in	Enhancement	2.4.0.0
Added angle display for electronic bubble. Enhancement  Added offset measurement mode. Enhancement	Survey interface.		
Added offset measurement mode. Enhancement	Added point name intelligent filling in Survey.	Enhancement	
	Added angle display for electronic bubble.	Enhancement	
Added offset item display in Line Stakeout. Enhancement	Added offset measurement mode.	Enhancement	
	Added offset item display in Line Stakeout.	Enhancement	

Added TTF font support for CAD Stakeout.	Enhancement
Added support for importing points with same name.	Enhancement
Added support for polygon import in KML KMZ base map.	Enhancement
Display files according to file format when importing from the cloud.	Enhancement
Added LandXML road format section data import and section stakeout.	Enhancement
Added the logic of calculating road stakes by integer miles in Pile point detail.	Enhancement
Added SP description line to RW5 export.	Enhancement
Added latitude and longitude dd.mmssss format in Export.	Enhancement
Added the function of long press TAP key to enter TAP interface on TC80.	Enhancement
Added SBAS satellites mask.	Enhancement
Added network module status display in receiver network mode.	Enhancement
Added external power supply status display.	Enhancement
Added List mode display of main menu.	Enhancement
Added the option of left/right side calculation in Two point intersection.	Enhancement
Updated Portuguese language.	Enhancement
Modified Philippines, Morocco, Canada coordinate system.	Enhancement
Added grids and geoids of Belgium, Turkey grid, France and Romania.	Enhancement
Fixed the issue that KML may fail to import.	Bug Fix

	1	
Fixed the issue that the lines in KML base map	Bug Fix	
may disappear when re-entering interface.	Bug IIX	
Fixed the issue of import failure when the file	Bug Fix	
contains point data with the same name.	dug rix	
Fixed the issue that NCN file can't be imported		
if it contains extra spaces, and adjusted the	Bug Fix	
display of point names in NCN export.		
Fixed the issue that the related files of SHP file	Dug Fiv	
can not be exported to the cloud.	Bug Fix	
Adjusted the antenna height in RW5 export,	Due Fix	
and record it to the ARP height.	Bug Fix	
Fixed the issue that line breaks lead to display	D	
error when exporting CSV.	Bug Fix	
Fixed the issue that RTCM1021-1027 may be		
calculated incorrectly, and added the mark of	Bug Fix	
elevation application calculation.		
Fixed the issue of not getting new base after		
modifying base antenna height, and added the	Bug Fix	
base change pop-up window in Survey.		
Fixed the issue that the distance to base		
station is not displayed in the location	Bug Fix	
information interface.		
Fixed the issue that averaging in control point	D	
survey mode may be calculated incorrectly.	Bug Fix	
Fixed the issue that the calculation of forward		
and backward text instructions may be wrong	Bug Fix	
in Line Stakeout.		
Fixed the issue of UCS coordinates and current	Due Fix	
position wrong display in CAD Stakeout.	Bug Fix	
	•	•

Adjusted the display digits of SN number.	Bug Fix	
Fixed the issue that some configurations of		
NMEA output may not be effective, and added	Bug Fix	
the configuration of NMEA output frequency.		
Fixed the issue that TIN generated for some	5 5:	
graphs may not be correct in Earthwork.	Bug Fix	
Fixed the issue that the result may be not		
correct when choosing to calculate L from A in	Bug Fix	
Offset Point tool.		
Added the ability to automatically download		
when the coordinate system selected in new	Enhancement	
project contains missing grid and geoid files.		
Added the judgment and pormpt if there are	F.I.	
points with the same name in Point Import.	Enhancement	
Adjusted the interface of road input and added	F.I.	
the road preview function.	Enhancement	
Added controller voice broadcast function.	Enhancement	
Added Base info tab page in the location		
screen, displaying information including base	Enhancement	2.45.0
power, base satellite count and format.		2.4.5.0
Added base abnormal movement alert.	Enhancement	
Added the function of measuring when the tilt	Ful	
compensation fails but the pole is vertical.	Enhancement	
Added KLIC XML vector map format support		
and related color display.	Enhancement	
When Stakeout prompt type is set to North		
and south direction, adjusted the blue arrow	Enhancement	
to be North-South.		
Added the coordinate display when selecting	Enhancement	

the staking points.		
Added the configuration of displaying survey	Enhancement	
and stakout points in the line stakeout screen.	Ennancement	
Added the choice of calculating L from A or	Enhancement	
from B in the tool Offset Point From Line.	Enhancement	
Added Kazakhstan predefined coordinate		
system, modified Turkey, South Africa	Enhancement	
predefined coordinate system.		
Added Bosnian, updated German.	Enhancement	
Fixed the issue that RTCM1021, 1023, 1025	Dug Eiv	
check configuration may not be saved.	Bug Fix	
Fixed the issue that APP shortcut keys on	Bug Fix	
controller may repeatedly start the software.	bug rix	
Fixed the issue that the distance calculation to	Bug Fix	
the base may be wrong.	Bug Tix	
Added support for LUKA connection.	Enhancement	
Added support for David30-D connection.	Enhancement	
Added the zone number setting for Gauss	Enhancement	
Krueger 3-degree zone projection.	Emiancement	
Optimized the login and registration interface	Enhancement	
of Tersus Cloud service.	Emiancement	
Added the AR mode in Point Stakeout.	Enhancement	2.4.4.0
Added support for importing PHI road format.	Enhancement	2.4.4.0
Added TIN Display setting in Surface Stakeout.	Enhancement	
Added Record Antenna Type configuration in	Enhancement	
Static Survey.		
Added the export of RAW format.	Enhancement	
Added export content for HTML and RW5.	Enhancement	
Updated predefined CRS of Oman, Switzerland,	Enhancement	

Germany, Russia and El Salvador.  Updated Spanish, French, Dutch display.  Fixed the problem that the data initialization may fail in Survey and Stakeout interface with larger geoid files.  Fixed the problem that static parameters cannot be modified after recording stopped.  Fixed the problem that the antenna type is incorrect in David30 static survey.  Fixed the problem that the tilt data bar was not cleared after turning off the tilt.  Fixed the problem that Dis to Base in the data bar was incorrect when the unit is feet.  Fixed the problem that Miles in the data bar was incorrect in Line Stakeout with offset.  Fixed the crash in searching or selecting survey points when manually starting base mode or creating staking lines.  Fixed the problem that the default export format could not be separated automatically with Excel in European region.  Fixed the crash of Azimuth Distance when the angle format is DMS.  Fixed the problem that it may take a long time to start the software on Android 11 and above.  Fixed the problem of incomplete display in main page in some languages.  Enhancement  Enhancement  Bug Fix  Enhancement  Bug Fix		
Fixed the problem that the data initialization may fail in Survey and Stakeout interface with larger geoid files.  Fixed the problem that static parameters cannot be modified after recording stopped.  Fixed the problem that the antenna type is incorrect in David30 static survey.  Fixed the problem that the tilt data bar was not cleared after turning off the tilt.  Fixed the problem that Dis to Base in the data bar was incorrect when the unit is feet.  Fixed the problem that Miles in the data bar was incorrect in Line Stakeout with offset.  Fixed the crash in searching or selecting survey points when manually starting base mode or creating staking lines.  Fixed the problem that the default export format could not be separated automatically with Excel in European region.  Fixed the problem that opening CAD drawings may fail on Android 11 and above.  Fixed the problem that it may take a long time to start the software on Android 11 and above.  Fixed the problem of incomplete display in Bug Fix	Germany, Russia and El Salvador.	
may fail in Survey and Stakeout interface with larger geoid files.  Fixed the problem that static parameters cannot be modified after recording stopped. not be displayed in the Survey and Staekout		
interface.		
Fixed the issue that the calculation of Oblique	Bug Fix	
Mercator Projection may not be correct.	Bug Tix	
Fixed the issue of crashing after exporting and	Bug Fix	
clicking share.	Bug Tix	
Added millimeter unit setting and optimized	Enhancement	
the display of drawing in CAD Stakeout.	Emiancement	
Added cross section export format and fixed	Enhancement	
the problem of incorrect display of offsets.	Enhancement	
Fixed the issue that the cut or fill value	Dug Fiv	2.3.2.2
calculated in Line Stakeout may be incorrect.	Bug Fix	
Fixed crash when searching for staking points	Dug Fiv	
and inability to select search results.	Bug Fix	
Optimized the display of Spanish language.	Bug Fix	
Added the import of LandXML, KML, KMZ	Enhancement	
vector maps.	Emancement	
Added support for importing LandXML triangle		
network and selecting points to create a plane	Enhancement	
or triangle network in Surface Stakeout.		
Added support for importing LandXML	Fulcassass	
alignment in Road Stakeout.	Enhancement	2.2.2.0
Added point name increment setting in Survey.	Enhancement	2.3.2.0
Added the code display setting in Survey.	Enhancement	
Added staking by nearby for polylines and arcs.	Enhancement	
Added support for 3dpolyline in CAD Stakeout.	Enhancement	
Added the output of code in RW5 export.	Enhancement	
Added the function of switching format when	Enhance	
inputting angle value in Tools.	Enhancement	

Fixed the US predefined coordinate system.  Fixed the US predefined coordinate system.  Optimized the performance of vector map loading.  Fixed the issue in Android 11 where Bluetooth scanning could fail without location services turned on.  Fixed the issue that the antenna type may be empty and the issue that the elevation may be wrong after editing the point when connecting to David.  Fixed the issue that when the Survey with confirmation is not turned on, the stake point may not be stored in line stakeout, the antenna parameters may be displayed incorrectly in point detail and the PPK survey may repeat the collection point.  Fixed the issue that the offset may be displayed as negative in Point Stakeout.  Solved the problem of incorrect filling and Bug Fix	Adjusted the order of the project list display,	
Added the configuration of whether to apply RTCM1021-1027 to the current project CRS.  Updated Russian, Polish, Dutch and Turkish.  Added Cambodia, Estonia predefined coordinate system. characters to 30.	Elmancement	2.2.7.0
Allowed swithing staking point by directly click	Enhancement	2.2.7.0
it on the map when staking points.	Enhancement	
Increased the function of cross-section	Enhancement	
stakeout in the road stakeout module.	Elmancement	
Optimized the logic of road stakeout by		
interval and by nearest in the road stakeout	Enhancement	
module.		

Increased the search function when selecting points in Parameters Calculation, Point	Enhancement	
correction and Base Shift.	Limaneemene	
Added the map view when selecting the point		
library in COGO and other functions.	Enhancement	
Added Points average calculation tool.	Enhancement	
Fixed the problem of new project failure when	Bug Fix	
selecting some coordinate systems.	Bug I IX	
Fixed the problem of the incorrect stakeout		
prompt when selecting South African	Bug Fix	
coordinate systems.		
Fixed the problem that the default name of		
stake point may not be automatically stepped	Bug Fix	
in the stakeout function.		
Fixed a possible error in the calculation of road	Bug Fix	
intersection method.		
Fixed the problem that the stake point will		
incorrectly be added to the point libarary in	Bug Fix	
the area stakeout module.		
Fixed the problem of incomplete display of		
some information in the interface of Bluetooth	Bug Fix	
pairing and location information.		
Added the mouse selection tool, the explode		
tool, the background switching function, and	Enhancement	
optimized the button display in the CAD		
stakeout module.		2.2.6.0
Added the graphical display of the filling and	Enhancement	
cutting instructions in the surface stakeout.		
Added the function of entering the point name	Enhancement	

to select the point when add a stakeout line or		
in COGO.		
Added Oscar host network module status display.	Enhancement	
Added Oscar host language setting.	Enhancement	
After selecting the coordinate system when		
creating a new project , added the step of	Enhancement	
confirming the coordinate parameters.		
Added line segmentation tool.	Enhancement	
Added Peru predefined coordinate system and added Vietnamese language.	Enhancement	
Solved the problem that the road intersection method may be calculated incorrectly.	Bug Fix	
Solved the problem that the six parameters of height parameters fitting may be calculated incorrectly and saved with insufficient accuracy.	Bug Fix	
Optimized the QR code of project parameters sharing, solved the problem of failure of scanning QR code.	Bug Fix	
Optimized the display of Turkish language	Bug Fix	
Added CAD Stakeout module.	Enhancement	
Added Area Stakeout module.	Enhancement	
Added the function of keeping the base mode after reboot in manual start base.	Enhancement	2250
Added the function of keeping coordinates after reboot in auto start base.	Enhancement	2.2.5.0
Added some customization requirements.	Enhancement	
Fixed the problem that the intersection	Bug Fix	

method may be incorrectly calculated and		
plotted when using some road data.		
Optimized the rule of reading files when importing data.	Bug Fix	
Fixed the problem that file sharing through wechat and other tools may fail after data export.	Bug Fix	
Modified the default projection of CGCS2000, BJ54 predefined coordinate system to 3-degree zone.	Bug Fix	
Added Israel predefined coordinate system.	Enhancement	
Optimized the text display of DXF base map.	Enhancement	
Added the function of setting unit when importing and exporting DXF.	Enhancement	
Increased the import and export of txt format.	Enhancement	
Added survey configuration saving logic.	Enhancement	
Added support for Rinex 3.04 when connecting to Oscar.	Enhancement	
Added Stop and Go function when connecting to Oscar.	Enhancement	2.2.4.0
Added the function of clearing disk and the function of debug configuration when connecting Oscar.	Enhancement	
Solved the problem of startup crash caused by failing to obtain permissions when installing software on some Android 8 and 10 phones	Bug Fix	
Solved the problem of crash when using some functions on some Android 10 and 11 cell phones.	Bug Fix	

Fixed the problem of detail point survey program on the text survey interface.	Bug Fix	
Fixed the display issues in the survey program due to the display configuration.	Bug Fix	
Fixed the problem that the positioning icon of		
the stakeout interface is shifted under some		
display resolutions, and optimize the display of	Bug Fix	
release interface and release prompt sound.		
Fixed the problem of incorrect calculation of		
the target point in road stakeout after applying	Bug Fix	
base shift.		
Fixed the problem of possible jamming when	Dug Fix	
adding antennas.	Bug Fix	
Added building polyline, arc and circle for line	Enhancement	
stakeout.	Emancement	
Added funtion of selecting a line for stakeout		
on the DXF base map, optimized function of	Enhancement	
selecting the point for stakeout.		
Added Grid to Ground tool.	Enhancement	
Added road stakeout real-time mileage stakeout, optimized the offset display.	Enhancement	
Added control point survey mode.	Enhancement	2.2.3.0
Added Traditional Chinese language option.	Enhancement	
Added Gauss 3-Degree Zone projection.	Enhancement	
Added Columbia Medellin predefined		
coordinate system, France RGF93 Lambert-93	Enhancement	
predefined coordinate system.		
Added support of modifying pole height in tilt-on state.	Enhancement	

Fixed the issue that the registration status displayed for David may be incorrect.	Bug Fix	
Fixed the issue that importing data of ECEF	Bug Fix	
coordinates may fail.	508111	
Added length unit support of US feet.	Enhancement	
When creating a new project, added the		
selection portal of plane grid and geoid.	Enhancement	
Added support for Ireland 35 parameter		
conversion model, add Ireland geoid of gri	Enhancement	
format.		
Added support for French geoid of MNT	Falance	
format.	Enhancement	
Added the predefined coordinate system of	Enhancement	
Philippines.	Enhancement	
During connecting with David, added the		
function of decoding and applying	_	
RTCM1021/1023/1025 when receiving CORS	Enhancement	2.2.2.0
data through the controller network.		
Added function of getting the nearest point		
and its mileage on the design road when	Enhancement	
staking a road.		
Optimized the application after unit setting,		
effective for import and export and other	Bug Fix	
functions.		
Optimized the processing of the deviation		
between the device positioning and the central		
meridian of the project, it will no longer	Bug Fix	
correct the central meridian automatically, but		
ask whether to jump to the project parameters		

	1	
interface for manual correct.		
Optimized the interaction of the stakeout		
interface, it automatically obtains 5Hz position	Bug Fix	
data refresh frequency when entering stakeout		
interface.		
Solved the issue that David may crash when	Bug Fix	
connected by USB in the previous version.	0	
Added photo taking function after point measurement.	Enhancement	
Added QR code sharing function for survey point.	Enhancement	
Added display and export of ECEF-XYZ coordinate and BLH (Local) coordinate.	Enhancement	
Added NCN format import and export,  KML/KMZ format import and export.	Enhancement	
Added base station point export.	Enhancement	
Added the display form of ENh coordinate.	Enhancement	
Added simulation connection function.	Enhancement	2.2.1.0
Added the function of registration by scanning code.	Enhancement	2.2.1.0
Added function of setting satellite system.	Enhancement	
Added Oscar log download function and	Enhancement	
battery change mode setting.	Emancement	
Added function of automatically connect Oscar	Enhancement	
when starting software.		
Added Oscar internal radio call sign setting	Enhancement	
function.		
Added differential delay threshold limit.	Enhancement	
Added display of 2D/3D error in the whole	Enhancement	

interface.		
Added earthwork calculation tool.	Enhancement	
Added anglular bisector calculation tool.	Enhancement	
Corrected Sweden predefined coordinate system.	Bug Fix	
Optimized GSF geoid support.	Bug Fix	
Optimized French resources.	Bug Fix	
Fixed the problem that the coordinates are not refreshed in time between start and stop.	Bug Fix	
Added David30 device support.	Enhancement	
Added Swedish predefined coordinate system.	Enhancement	
Added notice of installing the radio antenna when starting up the Oscar internal radio base mode.	Enhancement	
Fixed the occasional delay in coordinates refreshing when connecting with Oscar.	Bug Fix	2.2.0.0
Updated the display of modulation when setting the Oscar internal radio mode.	Bug Fix	
Fixed the issue that getting the central meridian by clicking the button and getting the central meridian automatically when connecting the device are logically different.	Bug Fix	
Added the predefined coordinate system of Tianjin 2000.	Enhancement	
Added the predefined coordinate system of Netherlands RDNAP2008, and support for the ASCII format horizontal grid and vertical grid under this coordinate system.	Enhancement	2.1.10.0
Added the projection parameter setting, the	Enhancement	

button that the central meridian is	
automatically obtained according to the	
current position.	
Added the function of survey point editing,	
allowing to modify the point name and	Enhancement
antenna information of the measured point.	
Added the function of checking coordinates via	
road mileage.	Enhancement
Added the display of modulation type and	
channel bandwidth when connecting to Oscar	Enhancement
and using the internal radio.	
Added the network link of TCS protocol when	
connecting with David.	Enhancement
Added the display of the distance from the	Enhancement
previous survey point in the survey interface.	Enhancement
Added the display of stakeout collection points	Enhancement
in the stakeout interface.	Enhancement
When staking out the line to the vertical point,	
if the vertical point is on the extension line,	Enhancement
added the drawing display of the extension	Elmancement
line.	
When staking out the line to the stake point,	
added the memory of stake number, and	Enhancement
re-enter line stakeout will continue stakeout	Linancement
according to the stake number before exiting.	
Fixed the problem that the antenna type is	
empty in the survey configuration after Oscar	Bug Fix
is connected via NFC when the software is not	- ~ B . W
started.	

Fixed the problem that it will stuck in the startup for a long time if there is a network problem when starting the PDA Network working mode.  Added data editing for cross section, super elevation, and widening of road module and side stakeout function for road stakeout module.  Added the display of vertical point or stake point mileage during line stakeout.  Added the distinguishing display of positive and negative offset during line stakeout.  Added the predefined coordinate system of Xi'an 80.  Fixed the crash problem after connecting to Oscar, turning on the static recording and quickly starting the rover radio mode.  Fixed the crash problem when importing illegal csv files.  Fixed the lagging problem when there are too many points in the Survey interface.  Fixed the problem that when the threshold of point stakeout is set too large, clicking the full image to display will lead a crash.  Fixed the problem that the software still displays the coordinate and solution status in the last second of the search when the satellite is not searching suddenly.  Fixed the problem that the offset may be Bug Fix			
elevation, and widening of road module and side stakeout function for road stakeout module.  Added the display of vertical point or stake point mileage during line stakeout. stakeout prompt type.		
Fixed the problem that when the tilt function is		
turned on, the rover mode is stopped and the	Bug Fix	
coordinates are no longer refreshed.		
Support DXF import as the base map, and add		
function of selecting points on the DXF base	Enhancement	
map to the staking point library.		
Add the export of the collected line when	Enhancement	
exporting DXF.	Emancement	
Support SIMA format import with empty		
elevation data, add the encoding setting when	Fabousset	
selecting SIMA import and export, to avoid the	Enhancement	
situation of garble code.		
When connecting with Oscar, it can be chosen		
to shut down the Oscar receiver at the same	Enhancement	
time when exiting Nuwa app.		
When configuring David at base mode, add the	Enhancement	2.1.5.0
'save config' statement.	Enhancement	
When performing point stakeout and line		
stakeout, add the search function for staking	Enhancement	
point and staking line.		
Add the checkbox 'Display All Staking Point' in		
the display config of the point stakeout	Enhancement	
interface.		
Adjust part of the statement display for		
English, Chinese, Japanese, and Greek.	Enhancement	
Add predefined Mexican coordinate system.	Enhancement	
Solve the crash of selecting empty project as	:	
the source project if there is no project in the	Bug Fix	
L.	I	I

арр.		
Added Bulgarian displayed.	Enhancement	
Added Irish pre-defined coordinate systems.	Enhancement	
Fixed the problem of low success rate of David connection.	Bug Fix	
Fixed a crash of the tilt enable button when		
connecting with Oscar Ultimate, if the Android	Bug Fix	
phones do not support GIF view.		2.1.4.0
Fixed the problem that when connecting Oscar		2.1.4.0
Ultimate and turning on the tilt enable, and	Bug Fix	
then switching to connect David, the tilt	Bug 11x	
button was still on.		
Fixed the crash of clicking the confirm button		
on ths soft keyboard on TC20 after modifying	Bug Fix	
the point name in stakeout.		
Added tilting initialization instructions,		
optimize tilting interaction, and add tilting	Enhancement	
initialization, measurement and lofting		
instructions in user manual.		
Added Malaysia RSO projection.	Enhancement	
Added Offset Point From Line in the Offset		
Point tool, to determine the Point on the	Enhancement	2.1.3.0
extension Line or the Point after Offset on the	Emandement	2.1.3.0
extension Line.		
Added the elevation difference, slope ratio and		
so on the calculation results in the Azimuth	Enhancement	
Distance tool.		
Added the Greek display in Nuwa.	Enhancement	
Added Slovenia predefined coordinate system.	Enhancement	

Added Morocco predefined coordinate system.	Enhancement	
Added Belgium predefined coordinate system.	Enhancement	
Added Netherlands predefined coordinate system.	Enhancement	
Added Guatemala predefined coordinate system.	Enhancement	
Added Columbia predefined coordinate system.	Enhancement	
Added Austria predefined coordinate system.	Enhancement	
Solved the problem that when connecting with David, the parameters of compass could not be read, and the stakeout indicating arrow was invalid.	Bug Fix	
Solved the problem that the DXF file exported by Nuwa may can't be imported into autocad.	Bug Fix	
Solved the problem that coordinates may not be refreshed after tilt off.	Bug Fix	
Fixed the problem of parameter calculation or point correction, in which the error details of each pair of points cannot be seen.	Bug Fix	
Optimized Japanese display.	Bug Fix	
Optimized Spanish display.	Bug Fix	
The input control is optimized. A one-click clear button is added to the input box. The latitude and longitude input box supports intelligent input and real-time format switching.	Enhancement	2.1.0.9
Added CGCS2000 predefined default coordinate system.	Enhancement	

In the connection interface the Bluetooth	Enhancement
name and MAC address display in newline.	
When connecting Oscar receiver and setting	
the base station mode, added CMR and RTD	Enhancement
differential formats.	
When connecting Oscar receiver and setting	
static, added configuration record duration,	Enhancement
and add recorded duration display.	
When connecting Oscar receiver and setting	
the built-in network base station mode, added	Enhancement
Ntrip protocol support.	
When connecting Oscar receiver, added NMEA	Enhancement
serial output configuration.	Ennancement
When connecting Oscar receiver, added disk	
usage display and remaining capacity display.	Enhancement
Added heading display when connected to	Faboracas
David plus.	Enhancement
Adjusted the size of the point name on the	Ful- and and
Survey interface.	Enhancement
Added SHP basemap import function.	Enhancement
Added satellite map display on the online map	Falsansan (
of Survey interface.	Enhancement
Added the function of stakeout to the vertical	Falsansan (
point on the line for Line stakeout.	Enhancement
Modified the point type of the collection point	
during stakeout to "Stakeout collection point"	
to distinguish it from general Detail points and	Enhancement
added the property of distance from the target	
point.	

	T	
Fixed the problem of using the layer name as the point name in other import - DXF import.	Bug Fix	
Fixed other import - SHP import failure issues.	Bug Fix	
Fixed the problem of low success rate of NFC connection.	Bug Fix	
Fixed the problem of displaying registration information error when connecting unregistered Oscar receivers.	Bug Fix	
Fixed the problem that the base coordinates of the collection point are incorrect when switching between network 1 + 1 mode and VRS mode.	Bug Fix	
Organized Chinese and Japanese translations in the app.	Bug Fix	
Added the function of the plane grid.	Enhancement	
Added the support of GRD, GSF, OSGB plane grid or geoid.	Enhancement	
Added the function of online download plane grid or geoid.	Enhancement	
Added the import and export of SIMA format files.	Enhancement	
When inputting the repeated line name to continue the Linework measurement, it is supported to choose from the start point or the end point.	Enhancement	2.1.0.8
Redo the line stakeout function. Stakeout to the point on the line according to the interval and the offset.	Enhancement	
Added the report file function in detail point	Enhancement	

survey, turn on the function and the coordinate of every epoch will be saved into		
a .txt file.		
Added the display of L5 SNR.	Enhancement	
Added button to cancel the display of	- Full and a support	
electronic bubble.	Enhancement	
Added the stakeout pointing arrow text		
description.	Enhancement	
Solved the crash problem when opening the		
Survey interface on some phones with higher	Bug Fix	
display resolution.		
The height value in the location share function		
is calculated to the coordinates of ground	Bug Fix	
points according to the antenna settings in		
Nuwa.		
Added Molodensky Badekas datum transform	Enhancement	
model.	Emandement	
Added Singapore predifined coordinate system	Full an armout	
SVY21.	Enhancement	
Added Australia predifined coordinate system		
GDA2020.	Enhancement	
Optimized the Survey interface, the survey		
button will change automatically and the		2.1.0.6
survey configuration will change according to	Enhancement	
the selection of Survey Mode(Detail or		
Continous).		
Optimized the Survey Config interface, the		
HRMS limited value and VRMS limited value	Enhancement	
will change according to the Solution Limited.		

	T
Display optimization of the Survey Config	
interface. The Config in the Survey and the	
Stakeout function module only displays	Enhancement
relevant items; all configuration items are	
retained in the Survey Config.	
Adjusted the longitude and latitude	
coordinates display, put N, S, E, W after the	Enhancement
number.	
Opened to use TCS through PDA Network in	Falsonsons
Oscar base configuration.	Enhancement
Added the function of Oscar registration by	Enhancement
Nuwa.	Enhancement
Added the limit to 5 survey points when	
connecting to general instruments of NMEA	Enhancement
mode.	
Corrected some translation errors in English	D
language.	Bug Fix
Solved the problem that sometimes the	
number of satellites used is larger than the	Bug Fix
number of visible satellites.	
Solved the problem of software exception if	Pug Eiv
click Device Info during NFC connection.	Bug Fix
Solved the problem of Nuwa software crash	
when connecting Oscar via NFC, if Nuwa is not	Bug Fix
provided system permission.	
Solved the problem in XML export that the	Dug Fiv
solution state of all survey points are fixed.	Bug Fix
Solved the problem when repeated using the	Dug Fiv
baseshift, the value of Base shift and the actual	Bug Fix
	•

coordinate shift are not the same.		
Solved the problem that the survey points in		
the Survey interface may not be displayed	Bug Fix	
when the Survey Style is Detail.		
Solved the problem that the point cannot be		
selected to stakeout when importing NE points	Bug Fix	
to the Stakeout point library.		
Solved the problem of Nuwa crash for some	2 5.	
android 9.0 models.	Bug Fix	
Adjusted the display of Tilt Angle quality, Tilt		
direction quality and Heading quality in tilt	Bug Fix	
measurement.		
Adjusted the algorithm for calculating the		
Distance to base, the incorrect result can be		
avoided by calculating according to the XYZ	Bug Fix	
coordinate in the case of projection		
unselected.		
Changed the tone frequency of stakeout	D . F:	
prompt distance(long) from 5s to 2s at a time.	Bug Fix	
Fixed the crash when connecting devices using	D	
Android 9 caused by the API level change.	Bug Fix	
Fixed the problems that Nuwa is unable to		
obtain HTTP permissions using Android 9		2.1.0.5
caused by the API level change, including	Bug Fix	
inablity to perform software automatic update		
and online map display.		
Added moving direction indicator arrow in	Enhance as a set	
stakeout interface.	Enhancement	2.1.0.3
Added the circle display whose radius is equal	Enhancement	

to the prompt tone distance in stakeout		
interface.		
The prompt tone in different grades in		
stakeout interface. When the surveyor is		
approaching to the point to stake out, Nuwa	Enhancement	
beeps every 5 seconds. When the surveyor	Emancement	
arrives at the point to stake out, Nuwa beeps		
every 1 second.		
Added the XML format export which supports		
being imported to EZSurv to post process	Enhancement	
Stop&Go data.		
Adjusted DXF export, add height coordinate		
and height annotation. Distinguish layers	Enhancement	
according to different kinds of annotations and	Emancement	
point feature property.		
Added GNSS Linework function. The survey		
line will be displayed in survey interface. The	Enhancement	
survey line allows operations such as delete	Limancement	
point, insert point, and continue surveying.		
Change the API level to 28 and re-launch on	Bug Fix	
Google Play.	DUG I IA	
Fixed the issue that the point coordinate saved		
to the Point database may be wrong in the	Bug Fix	
case of the Base Shift.		
Fixed incomplete import Stakeout Point	Bug Fix	
selecting all from Survey Point.	DUB I IA	
Fixed the crash issue when turning on location	Bug Fix	
share function for some android devices.	Dug I IA	
Tilt compensation function is available for	Enhancement	2.0.1.6

	I	<u> </u>
Oscar Ultimate model.		
Added elevation stakeout for point stakeout	Enhancoment	
and line stakeout.	Enhancement	
Opened the TCP Client function for the	Enhance	
receiver network.	Enhancement	
Solved the problem that conversion from NEh		
to BLH may be incorrect when there are seven	Bug Fix	
parameters.		
Solved the problem that selecting the		
coordinate system from the Coord System List	Bug Fiv	
is not effective when editing the project	Bug Fix	
parameters.		
Solved the crash problem caused by the name		
containing illegal characters when creating a	Bug Fix	
new project.		
After setting the latitude and longitude format		
to DD:MM.MMM, the number of decimal	Bug Fix	
places is changed to 7 digits.		
Solved the problem that the link and		
differential delay are not displayed on the	Bug Fiv	
survey interface when Oscar is set as the	Bug Fix	
receiver network rover mode.		
Solved the problem that the debug button in		
the device info interface sometimes is opened	Rug Fiv	
illegally when switching from connecting David	Bug Fix	
to connecting Oscar.		
Corrected the English expression of the		
altitude and geodetic height on the survey	Bug Fix	
interface.		

Corrected the English expression of long press to cancel the Bluetooth match on the connection interface.  The display of base point coordinates is changed to ground when base antenna height is obtained.  The display of north / east direction STD is added to the survey point attribute which is Enhancement allowed to be exported.
changed to ground when base antenna height is obtained.  The display of north / east direction STD is added to the survey point attribute which is Enhancement allowed to be exported.
added to the survey point attribute which is Enhancement allowed to be exported.
During the point survey process, it is allowed to stop the survey by pressing the stop button.  Enhancement 2.0.1.4
Fixed the issue that after configuring David by  Nuwa to stop the base mode, restarting David Bug Fix it still displays as Base.
Fixed the probabilistic crash issue of returning to the main interface after completing the point staking.
Open Oscar Reset function Enhancement
The Collection End time of points in the point library will change with the software time zone setting  Enhancement
The project list is arranged in reverse chronological order by edit time
Fixed crash caused by choosing an empty coordinate system
Fixed the probabilistic crash in NFC connection Bug Fix
Fixed the probabilistic crash of setting Ntrip server after Oscar connection  Bug Fix
Fixed failure of setting up TCPClient in Bug Fix

connecting David		
Solved the problem that modifying antenna		
parameters does not take effect after the	Bug Fix	
survey of smooth points is completed		
Solved the problem that Base points would not		
increase after reaching 9	Bug Fix	
Fixed HTML export crash when there are		
stakepoints	Bug Fix	
Solved the problem that the export Collection		
End time property has no hour, minute, or		
second, when the separator is a space in	Bug Fix	
custom export		
Solved the problem that the searched results		
for the point library based on time is empty	Bug Fix	
Fix the severe problem that modification of	D . F:	2000
Ant Height is not effective in the Survey Config	Bug Fix	2.0.0.9
Supports new model Oscar	Enhancement	
Added display of base shift, datum transition,		
plane adjustment and height fitting in the	Enhancement	
interface of Satellite Info - Position		
For data import, it supports data preview	F-1	
before importing data	Enhancement	
For data export, it added HTML export	Enhancement	2.0.0.8
Custom import and export format support		
editing, viewing and deleting	Enhancement	
Added related tips in the Bluetooth pairing and	Enhancered	
device connection interface	Enhancement	
The base supports RTCM3.0 format	Enhancement	
The logic of Detailed Point acquisition is	Enhancement	

modified to pop up confirmation dialogue after		
, , ,		
the acquisition is completed		
Added threshold distance setting for stakeout	Enhancement	
tone		
In the survey configuration - Display		
configuration interface, added the check box of	Enhancement	
displaying all stake out points		
Solve the flashback problem of Nuwa in	Bug Fix	
landscape orientation display	dug rix	
Unify NEh coordinates and RMS data, retain 4	D . F'	
decimal places	Bug Fix	
Solve the application crash caused by the	D	
special registration date in the Demo Key	Bug Fix	
Solve the problem of incomplete display of	D	
part of the Spanish interfaces	Bug Fix	
Solve the problem that the seven parameters		
and the correction parameters are not	5 5:	
imported into the project parameters in the	Bug Fix	
newly created project		
Solve the problem of search failure according		
to time in point library search	Bug Fix	
Solve the problem that exporting the custom	5 5:	
interface cannot slide	Bug Fix	
Solve the problem that in the survey interface	B . 5	
the speed is not refreshed	Bug Fix	
Adjust default antenna	Bug Fix	
Added Japanese JGD2011 coordinate system	Enhancement	400-
Optimized the stakeout prompt message	Enhancement	1.0.9.7
Fixed the problem of wrong name for the	Bug Fix	1.0.9.5
<del>-</del>		

Portugal coordinate system		
Fixed the problem of inaccurate acquisition		
time during the point collection	Bug Fix	
Optimized the SHP export coordinate format	Enhancement	
Optimized online upgrade information		
prompts	Enhancement	
Optimized Tools Offset Point calculation	Enhancement	
Optimized Tools Azimuth and Intersection  Angle calculation	Enhancement	
Optimized OSM online map loading	Enhancement	
Optimized the seven parameters calculation	Enhancement	
Optimized Survey Config options	Enhancement	
Optimized the function of adding stakeout	Enhancement	
points and control points		
Added Ghana's predefined coordinate system	Enhancement	
Added Portuguese predefined coordinate system	Enhancement	
Optimized static storage	Enhancement	
Optimized elevation fitting calculation	Enhancement	
Fixed elevation problems caused by geoid model during data inverse calculation	Bug Fix	
Fixed the flashback issue caused in certain situations	Bug Fix	1.0.8.0
Optimize DXF export	Enhancement	
Fixed the problem that the default is the		
control point library when importing points for	Bug Fix	
stakeout point library		
Fixed the problem that the interface has no prompt when the stakeout point is	Bug Fix	

approaching the stakeout point library		
Support collecting points with physical collection button in TC20 controller	Enhancement	
Support quick points collecting in 'point stakeout' and 'line stakeout' with physical collection button	Enhancement	
Add 'survey hotkey' in point survey configuration page	Enhancement	1.0.4.1
Fix average collection problem if the solution can't meet the requirements	Bug Fix	
Change the display of coordinate axis in projection parameters as X->North Y->East	Enhancement	
Optimized the calculation of parameters and the secondary calculation process of point correction	Enhancement	
Optimized the device connection experience	Enhancement	
Optimized the device registration experience	Enhancement	4.0.2.2
Optimized antenna management	Enhancement	1.0.3.3
In the survey configuration, the survey epoch is changed to be editable by users	Enhancement	
Added Oscar preview in Device Connection, so stay tuned!!	Enhancement	
Added support for common NMEA devices	Enhancement	
Added the function of automatically zooming the scale when approaching the stakeout point during point stakeout/line stakeout	Enhancement	1.0.3.2
Added multi-point selection function when importing stakeout points	Enhancement	
Solved the connection stability of NtripClient	Enhancement	

function under Spanish and other languages		_
Added the functions of Device Debug and	Enhancement	
static mutual exclusion		
Fixed the display problem when NtripClient	Bug Fix	
and TCPClient are connected	Dug Tix	
Modified the GNSS point coordinates displayed	Figh an assument	
in the base shift as BLH	Enhancement	
Optimized static record Station ID setting		
function	Enhancement	
Fixed crash when switching languages in		
Spanish and other languages	Bug Fix	
Combined the mount point and rover		
configuration to solve the problem of the	Enhancement	
display of the mount point history data		
Fixed the problem that the collection time		1
epoch does not take effect in the survey	Bug Fix	
configuration		
Fixed the problem of not displaying NEh		
coordinates when manually starting the base	Bug Fix	
station		
Fixed the problem that the base point cannot		
be selected in the base shift	Bug Fix	
Fix the stakeout point error on the map and		
coordinates error after the base shift	Bug Fix	
Fixed the error of multiple repetitive		1
calculations in the base shift	Bug Fix	
Added support for north-south/east-west	Enhancered	
hemisphere	Enhancement	
Optimize continuous point survey by distance	Enhancement	
		-

	<u> </u>	
Optimize continuous point survey by time	Enhancement	
Add the predefined coordinate systems of Malaysia and Romania	Enhancement	
Add the function of station-id setting during static measurement	Enhancement	
Add the function of Inner RTK control	Enhancement	
Add the function of importing projects	Enhancement	
Add preview function for predefined coordinate system	Enhancement	
Optimize the arrangement and display of countries or regions in the predefined coordinate systems	Enhancement	
Optimize the display of satellite quantity	Enhancement	
Optimize the display of antenna height interface	Enhancement	
'Connected' at the top of the main interface is changed to 'Connected'	Enhancement	
The position status of satellite interface for base station is changed to 'Base Manual' and 'Base Auto'	Enhancement	
Fix the problem of not displaying NEh coordinates when manually starting the base station	Bug Fix	
Add new projections: Cassini, Oblique Stereographic Alternative, Stereographic, and Transverse Cylindrical Equal Area	Enhancement	
Fix the problem of imported line files are not identified	Bug Fix	
Fix the problem of crashing when creating new	Bug Fix	

projects and point survey under Spanish		
language		
Optimize database upgrade	Enhancement	
Add predefined coordinate system	Enhancement	
Modify the satellite quantity display as 'satellite tracked / satellite used'	Bug Fix	
Optimize the export format of dxf file	Enhancement	
Fix the problem that the elevation increases when manually starting the base station	Bug Fix	
Optimize base shift experience	Enhancement	
Change shp/dxf export coordinates to local coordinates	Enhancement	1.0.2.8
Fix the problem that satellites on the Sat Tab interface has always shown true	Bug Fix	
Add differential data format display when using Ntrip to obtain source list	Enhancement	
Optimize system stability	Enhancement	
System compatibility is improved, compatible with upgrades on older software	Enhancement	
Fixed the problem that the antenna height disappeared in the device connection interface after reloading the software	Bug Fix	
Fixed the problem of the invalidity of static survey after canceling auto-start	Bug Fix	1026
Fixed the problem of the Ntrip Client set up failure for the rover	Bug Fix	1.0.2.6
Fixed the problem of the antenna height configuration failure for the rover	Bug Fix	
Optimize the software automatic update	Enhancement	

experience	
Optimize the device connections	Enhancement
Optimize continuous acquisition by time	Enhancement
Add Geoid Model: (1) support EGM96 and	
EGM08 at the same time; (2) optimize data	
loading and reduce waiting time for different	Enhancement
devices; (3) simplify algorithm calculation	
process and save system resources	
Add UTM projection support for the southern	Enhancement
hemisphere	Enhancement
Optimize the rules for point acquisition	Enhancement
automatic naming	Liniancement
Optimize the base shift function: (1) support	
multiple times of base shift; (2) support	
real-time modification of the shift parameters;	Enhancement
(3) reorganize the base shift logic; (4) redesign	
the base shift UI	
Optimize the solution state of the data export,	Enhancement
which is the same as the board definition	Limancement
Optimize the display of the antenna height	Enhancement
when manual-starting the base station	Limancement
Repair of other problems	Enhancement
Antenna height display optimization	Enhancement
Survey configuration: display configuration	Enhancement
optimization	Limancement
Re-enter static storage, status optimization	Enhancement
Static storage antenna optimization when	Enhancement
self-starting the base station	Liniancement
Line stakeout 'distance' distinguishes between	Enhancement

positive and negative		
Add column name for coordinate export	Enhancement	
Remove the 'Acquisition Status' of the 'Text		
Acquisition' interface	Enhancement	
'Smoothing' and 'Acquisition' are combined	Enhancement	
Ntrip site management: IP address display is	Dug Fiv	
incomplete	Bug Fix	
Click base/rover configuration without	Enhancement	
changing order	Elmancement	
Support for name modification of base/rover		
configuration	Enhancement	
User-defined name can be changed, the	Emancement	
system default name cannot be changed		
Add reminder when creating a new project	Enhancement	
Change the logic of antenna type choosing, the		
antenna type must be choosing before	Enhancement	
connection		
Change the default antenna height as pole		
height in surveying, change the default	Enhancement	
antenna height as slant height in static		
surveying		
Support choosing file type in import file	Enhancement	1.0.2.3
Add GPS mock location	Enhancement	
Fixed the error of configuration when build a	Bug Fix	
new project	Bug IIX	
Optimized the interface freeze if there are too	Enhancement	
many points in point survey interface	Liniancement	
Optimized the display of export interface	Enhancement	
Optimized the display of the result in two point	Enhancement	

intersection		
Optimized the display of title bar	Enhancement	
Optimized the option logic in import interface	Enhancement	
	Elliancement	
Change the voice output frequency in point stakeout	Enhancement	
Add RTCM1230 message in base model	Enhancement	
Fixed software crashed when sharing project	Bug Fix	
Optimized the logic to register David	Enhancement	
Optimized the device connection	Enhancement	
Support auto start static mode	Enhancement	
Add xyz apporoximate in rinex file	Enhancement	
Optimized the speed to log in CORS.	Enhancement	
Add point name and code in dxf format	Enhancement	
Fix the abnormity H value if the antenna slant	Bug Fix	
height is zero	Dug I IX	1022
Change the 'Projection' to 'CRS'	Enhancement	1.0.2.2
Change the threshold value in collect points by	5.1	
distance	Enhancement	
Optimized auto collect function by distance	Enhancement	
Optimized software access authority (it need		
location information authority at the same		
time when using Bluetooth if your android	Enhancement	
version is higher than Android 6.0)		
Optimized auto update function	Enhancement	1.0.2.1
Optimized the display of system language	Enhancement	
Optimized many default value	Enhancement	
Optimized the pop-up message when getting	Enhancement	
the first fixed solution	Liniancement	

Fixed the display error in height fitting title panel	Bug Fix
